Presenting My Parents

For several years my own likeness has been the subject of one of the pictures in my catalogue and this year I take pleasure in using a snapshot of my parents, Mr. and Mrs. Geo. A. Mitsch. It is to them that belongs the credit for any small measure of success in the field of bulb growing that I may have attained. Without their advice and assistance I fear that I would have abandoned my business before it was well started.

FOREWORD

Contrary to my plans of issuing a complete catalogue this year, I am forced by conditions beyond my control to cut down on descriptions, and hence have decided to issue only this supplement. Our summers are comparatively mild but are almost invariably dry with little or no rainfall from some time in June until September. Consequently, on most soils, in order to get good blooms one must plant early or irrigate. With retail commercial growers it is quite obviously impossible to plant much of the stock early enough to take full advantage of the spring rains. With these conditions prevailing, nearly all growers here depend on irrigation for good blooms and maximum increase. As my irrigation system failed to perform properly last summer, I had very few representative spikes and thus could not judge the flowers. Hence, my descriptions are necessarily very brief. I am hoping that another year I can issue my usual large catalogue again and until then I would refer my customers to my 1936 catalogue for more complete descriptions of varieties listed therein. However, please do not order from this 1936 catalogue as prices have changed and many varieties listed in it were not grown the past season and cannot be supplied now.

Although I am rather short on No. 1 bulbs of many varieties, I have a much larger number of smaller sizes than usual and I believe the quality of the stock is superior to that of most years. Fortunately, most of my seedling bulbs were planted earlier than the named stock and I was able to judge some of the selected seedlings sufficiently to write descriptions of those being introduced this year.

I wish to thank my customers for their patronage of the past season and for the many fine letters received. Below I give a few quotations from letters regarding my introductions of former years.

I've had some magnificent blooms from it (Christabel).—J. E. Suckling, London, Eng.

I take pleasure in stating that I think your Christabel and Flaming Meteor were two of the finest things we had in the garden this season.—J. H. Heberling, Easton, Illinois.

Just thought I would let you know what I think of Flaming Meteor and how it stood the dry hot summer. Only had 16 bulbs but cut 16 of the grandest spikes standing full 5½ feet tall, and what blooms, just grand, one of the best in my patch. Everyone admired it greatly.—W. F. Hemmerling, Waterloo, Iowa.

I wish to thank you especially for the free bulb of Christabel. We thought it the most beautiful Glad in our garden.—Miss Helen M. Conger, Mora, Minn.

I have grown Christabel three years and it is a real Glad, large bloom, good color, and straight spike. Flaming Meteor . . . is certainly a good red, 4½ to 5 feet from small size.—J. E. Odom, Amarillo, Texas.

Speaking of Flaming Meteor, Mr. R. L. Lord of Peoria, Illinois, writes: "I cannot say too much for it," and proceeds to tell of its performance under temperatures of 110 to 113 degrees.

The above are from just a few of the letters of similar nature received during the last few months.

INSTRUCTIONS FOR ORDERING

TERMS: Please send cash or 25% down and the balance may be remitted before delivery or bulbs sent C. O. D. for the remainder. Remittance may be made in money orders, drafts, or checks. On small orders currency or stamps may be sent but if stamps, please send in denominations of 2, 3, 5-cent or air mail. Five bulbs or bulblets may be purchased at the ten rate and 25 at the hundred rate unless otherwise priced providing such items do not total less than 10 cents. Prices prepaid in the United States on orders over \$1.00 and elsewhere on orders over \$2.50. Shipments on the Pacific Coast can usually be made anytime during the winter but Eastern shipments are better held until March 1st except in case of express shipments which may be sent out anytime. Smaller orders may be sent by express if purchaser desires to pay transportation and on orders over \$10.00, I shall prepay express if wanted delivered before March 1st.

Shipments to Australia and New Zealand can be made from December to June.

DISCOUNTS: 10% discount on orders of \$5.00 or over if accompanied by cash and 15% on orders over \$20.00. These discounts do not apply to bulbs listed in the wholesale list. If discount is not deducted by the customer, I endeavor to send something extra that will be satisfactory. Discounts do not apply on collections, or to 1937 introductions.

Quality of Stock

I aim to send out only healthy stock free from thrips or other pests. My stock has been fumigated and as for quality of bulbs, I always aim to send out bulbs that will give satisfaction. I cannot guarantee bulblets to grow but in case of failure, I am glad to make adjustment if the fault is mine.

Glad Publications

I would advise that every Glad fan join the New England Gladiolus Society and receive their large yearbook with many interesting articles on all phases of Glad growing. Send \$1.00 to the secretary, Albin K. Parker, Norwood, Massachusetts.

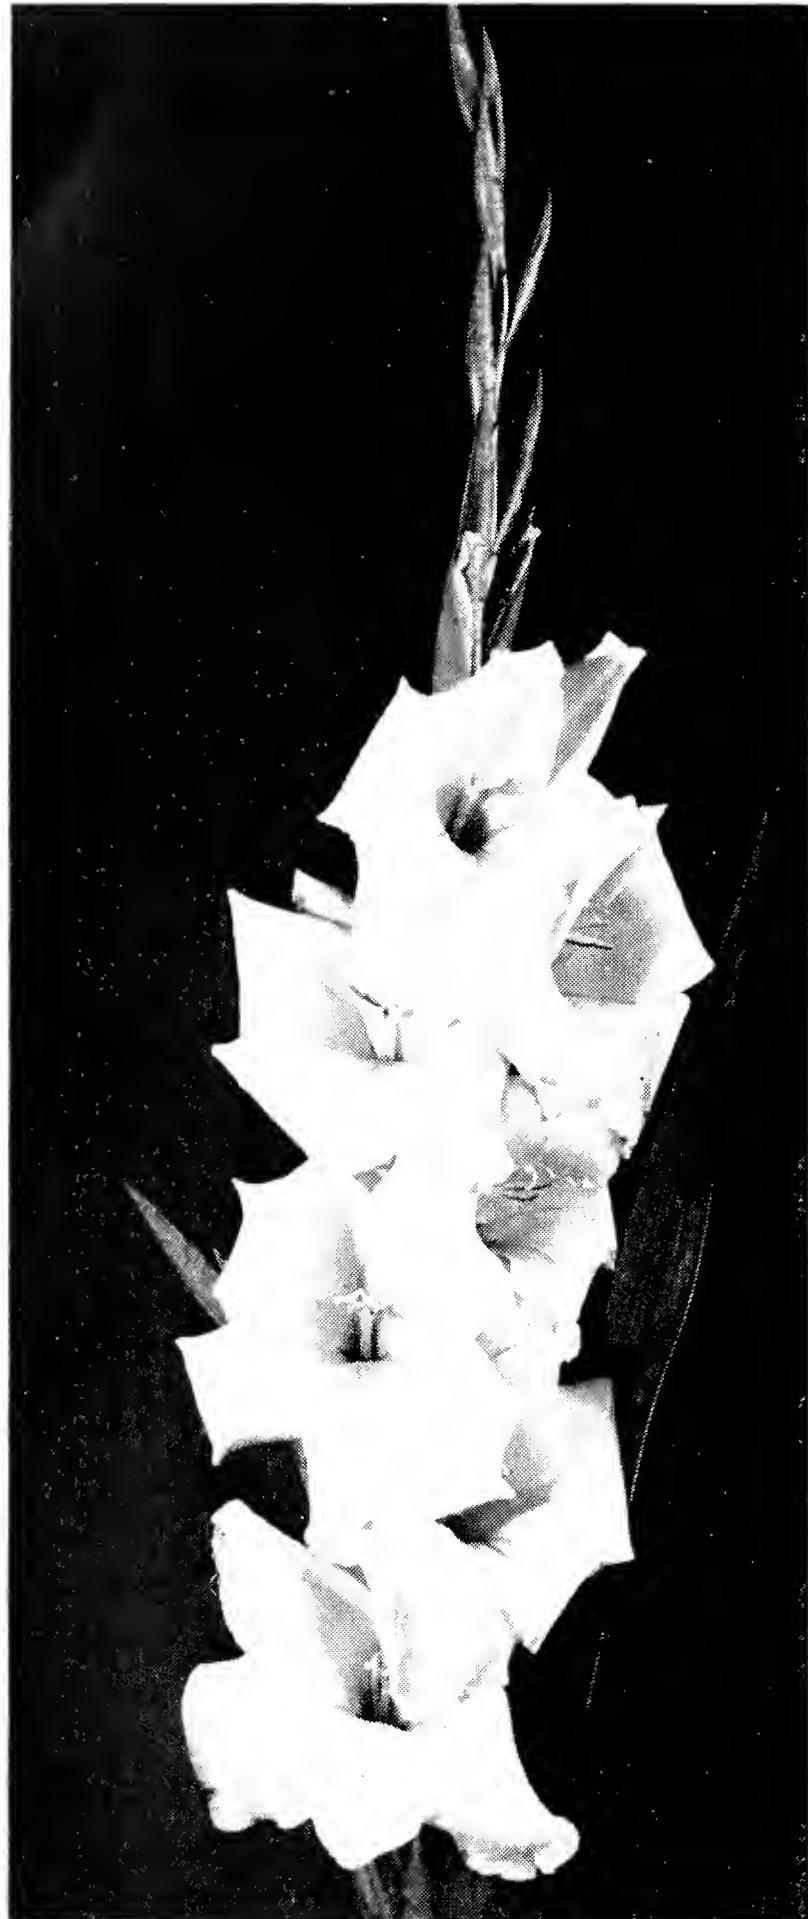

For those who want frequent Glad news, I suggest that a subscription of \$1.00 be sent in to Mr. H. I. Dally, Lebanon, Ohio, for The Glad Grower, a little magazine with timely articles on the problems of the Glad fan.

Iris Fanciers

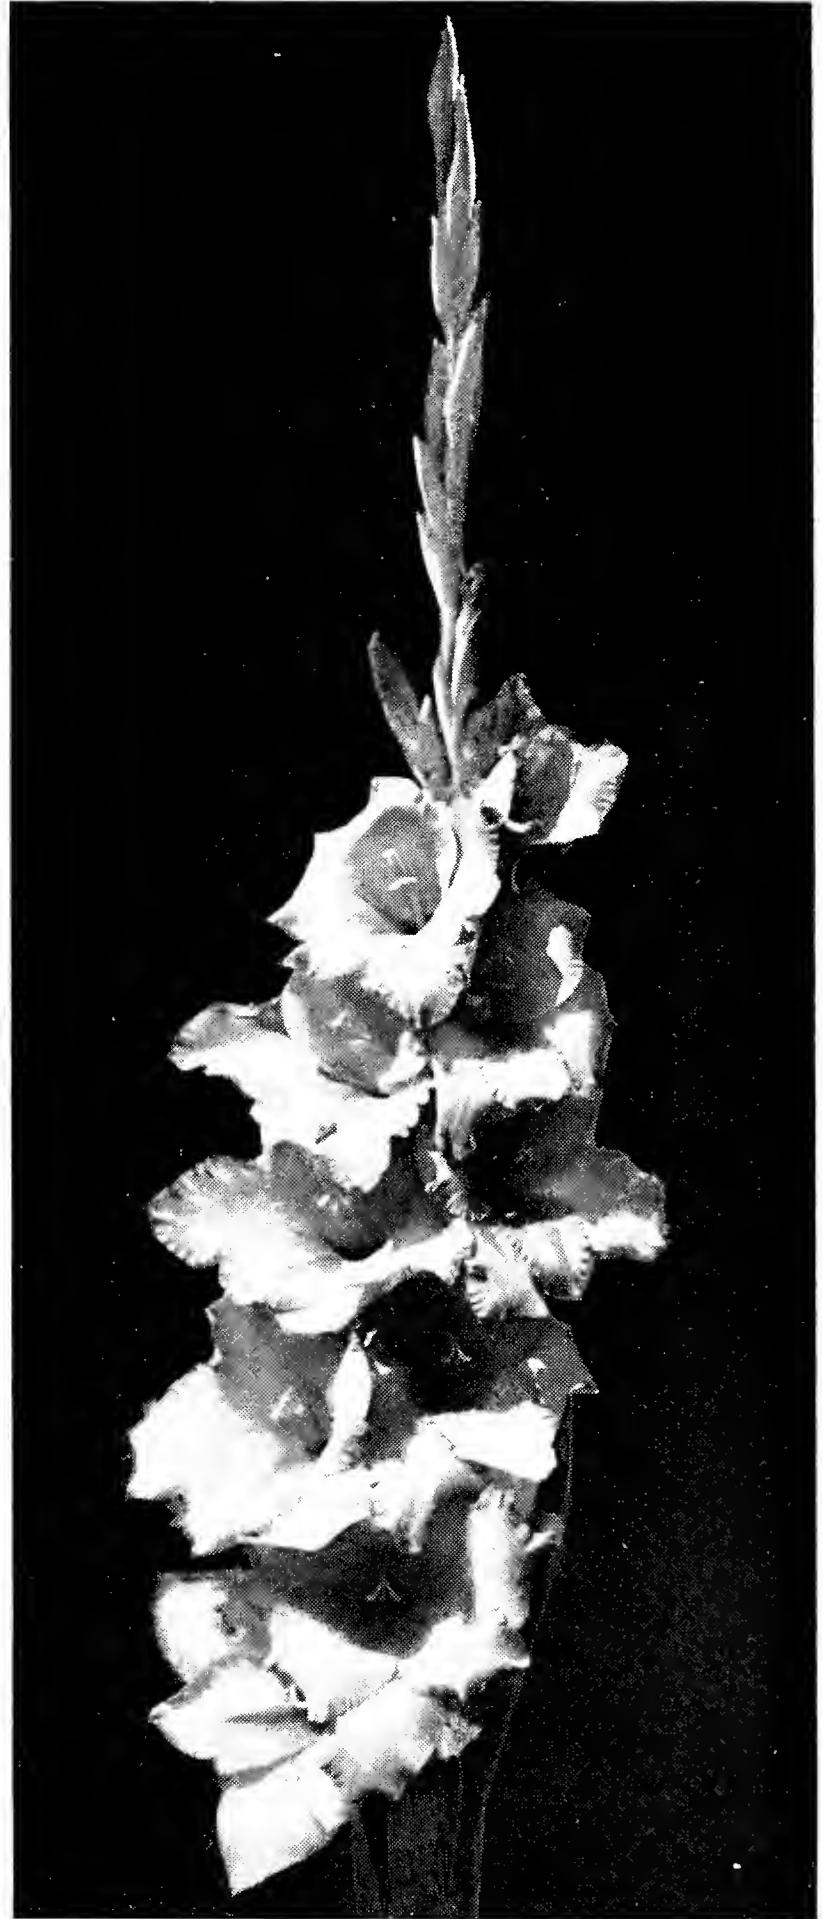

All interested in newer varieties of Iris are invited to send for my list of novelty Iris and Daffodils which will probably be issued in June.

Books

As in previous years, I am interested in exchanging bulbs for books on Natural History and kindred subjects that I can use. Also, for Geographic Magazines issued before 1909. Those having books that they think might interest me are invited to send for a list of my wants.

1937 INTRODUCTIONS

In the last two years I have introduced but one new variety but a large number of new seedlings have been grown each year and this season several new ones are being offered for the first time. Of my former introductions, Flaming Meteor is perhaps meeting with the most favorable reception and Christabel is the recipient of much commendation but I believe that among the 1937 offerings, one or two should be more popular than any of my previous introductions. With each order for my five new seedlings in collection, I shall include a bulb of a new white seedling that I anticipated introducing this year but due to dry weather and lack of irrigation, I was unable to judge it by its 1936 performance. It is from a cross of Albatross x Mammoth White and appears to have inherited the better characteristics of each parent. Two of the bulbs I sent out for trial brought reports that it was the best white seen by those who grew it. Following is the list of my new ones:

AACHEN (Fountain of Waters). A beautiful daintily ruffled lustrous cream Glad. A seedling from Picardy crossed with Barth's La Paloma and rather similar in size and shape to Picardy but possibly opens one or two more florets. This bloomed rather late the past season and the spikes were not quite so long as formerly due probably to dry growing conditions which stunted the spikes of all the named varieties but if it continues to make spikes as it did in former seasons, this will probably be the best commercial and exhibition variety in its class. **Bulbs of any size \$5.00 each.**

COLOSSUS. One of the largest Glads grown, reaching a size of 7½ to 8 inches without special culture or fertilizing. A rich pink with small red feather on a cream ground. Sometimes lightly flecked and shaded slate but usually clear. Not always of the best of form but good considering its immense size. Has good facing and up to nine blooms open. A seedling from Picardy x Oregon and rather like Oregon in color and form but still larger. Not so refined as the other varieties listed here but yet a very attractive flower. Should be a contender on the show table. Good propagator. **Bulbs of any size \$5.00 each.**

CONQUEST. Light salmon pink with cream throat blotches is the color description of this variety. A very pleasing color combination in a large well opened ruffled flower. Florets of good texture on a long tapering spike. This usually does not open more than five or six florets at once but is possessed of a refinement that makes it most desirable for cutting. Parentage: Picardy x Seedling (Gloriana x Mrs. Sisson). A good propagator and a large stock permits the low introductory price of **\$2.50 per bulb.**

RIMA. Among the finest of all cut flower varieties, this beautiful lilac pink with cream throat should prove a popular commercial variety. The individual florets are large and well faced on long spikes with up to seven open. Very heat resistant for a flower of such delicate coloring. Grows somewhat taller and has more buds to the spike with me than Picardy which is one of its parents. The other parent was a seedling from Longfellow and Pearl of California. Given a card of Commendation at the Maryland Trial Grounds. This has elicited very favorable comment from growers who have seen it. As it grows in the garden pink is the dominant color but when taken indoors, the lilac tones predominate. Opens up well indoors. A moderate propagator. **Bulbs of any size \$5.00 each.** As with the other varieties listed here, I am not offering bulblets for sale, but commercial growers desiring bulbs in quantity as outlined below may get a few bulblets free.

ZUNI. A very richly colored smoky Glad. A refined combination of salmon and slate with inconspicuous light orange salmon feather. Florets of medium size, well faced with up to ten open on a tall long spike having a good number of buds still to bloom. I believe this has the most evenly and delicately ruffled petal edges of any variety I grow. One of the most beautiful smokies and a strong vigorous grower making good spikes and large bulbs frequently from bulblets. A seedling from Picardy and Lighthouse. I do not have much stock of this as yet although it is a rapid propagator. **Bulbs of any size \$5.00 each.**

SPECIAL COLLECTION:

One bulb of each of the above for \$18.00. Six of each for \$100.00.

SPECIAL ON RIMA:

25 bulbs of any size for \$100.00 with 50 bulblets free.
12 bulbs of any size for \$50.00 with 24 bulblets free.
5 bulbs of any size for \$25.00 with 10 bulblets free.

SPECIAL ON CONQUEST:

25 bulbs of any size for \$50.00 with 50 bulblets free.
12 bulbs of any size for \$25.00 with 24 bulblets free.
6 bulbs of any size for \$15.00 with 10 bulblets free.

No free bulblets on orders for less than the amounts named above.

Prices on my 1937 introductions will not be lowered next year to the point where purchasers this year cannot come out on them. I expect to list Aachen, Colossus, Rima, and Zuni at \$3.00 each for large bulbs and 30 cents each for bulblets, and Conquest at half these prices in 1938.

IRAK

A grey sport of Bagdad which seems to be like its parent in every way except color. Perhaps every seedling grower who has worked much with smokies has had the experience of growing some beautiful greys only to find that they are very poor growers after the first year and are almost impossible to propagate. This Bagdad sport is both vigorous and prolific like its parent. Almost neutral grey but with enough life in its color to make it beautiful. Doutless some will not like this but I consider it a beautiful flower. A limited quantity of bulbs at **50c each for any size.** I advise early ordering if you have a choice of size.

SHIRLEY TEMPLE

(Pruitt, 1937)

I consider myself fortunate in being able to help introduce this wonderful new Glad for Mr. D. S. Pruitt. This fine seedling is a giant creamy white with creamy yellow throat blotches. Although very heavily ruffled, it develops long tapering spikes which are rather unusual in ruffled Glads, and what is more unusual for heavy textured ruffled varieties, it opens up well to the tip. While very large, this is a refined and beautiful flower. Contrary to my usual custom of not offering any variety that I have not grown myself, I feel this is well worth listing as I have had the opportunity of seeing the flower, both at my own home from spikes presented me by Mr. Pruitt and at Grants Pass where it won first place as the best exhibition seedling. A good grower and propagator. **No. 1 bulbs, \$10.00 each; No. 2 bulbs, \$7.50 each; No. 3 bulbs, \$5.00 each; bulblets, \$1.00 each.**

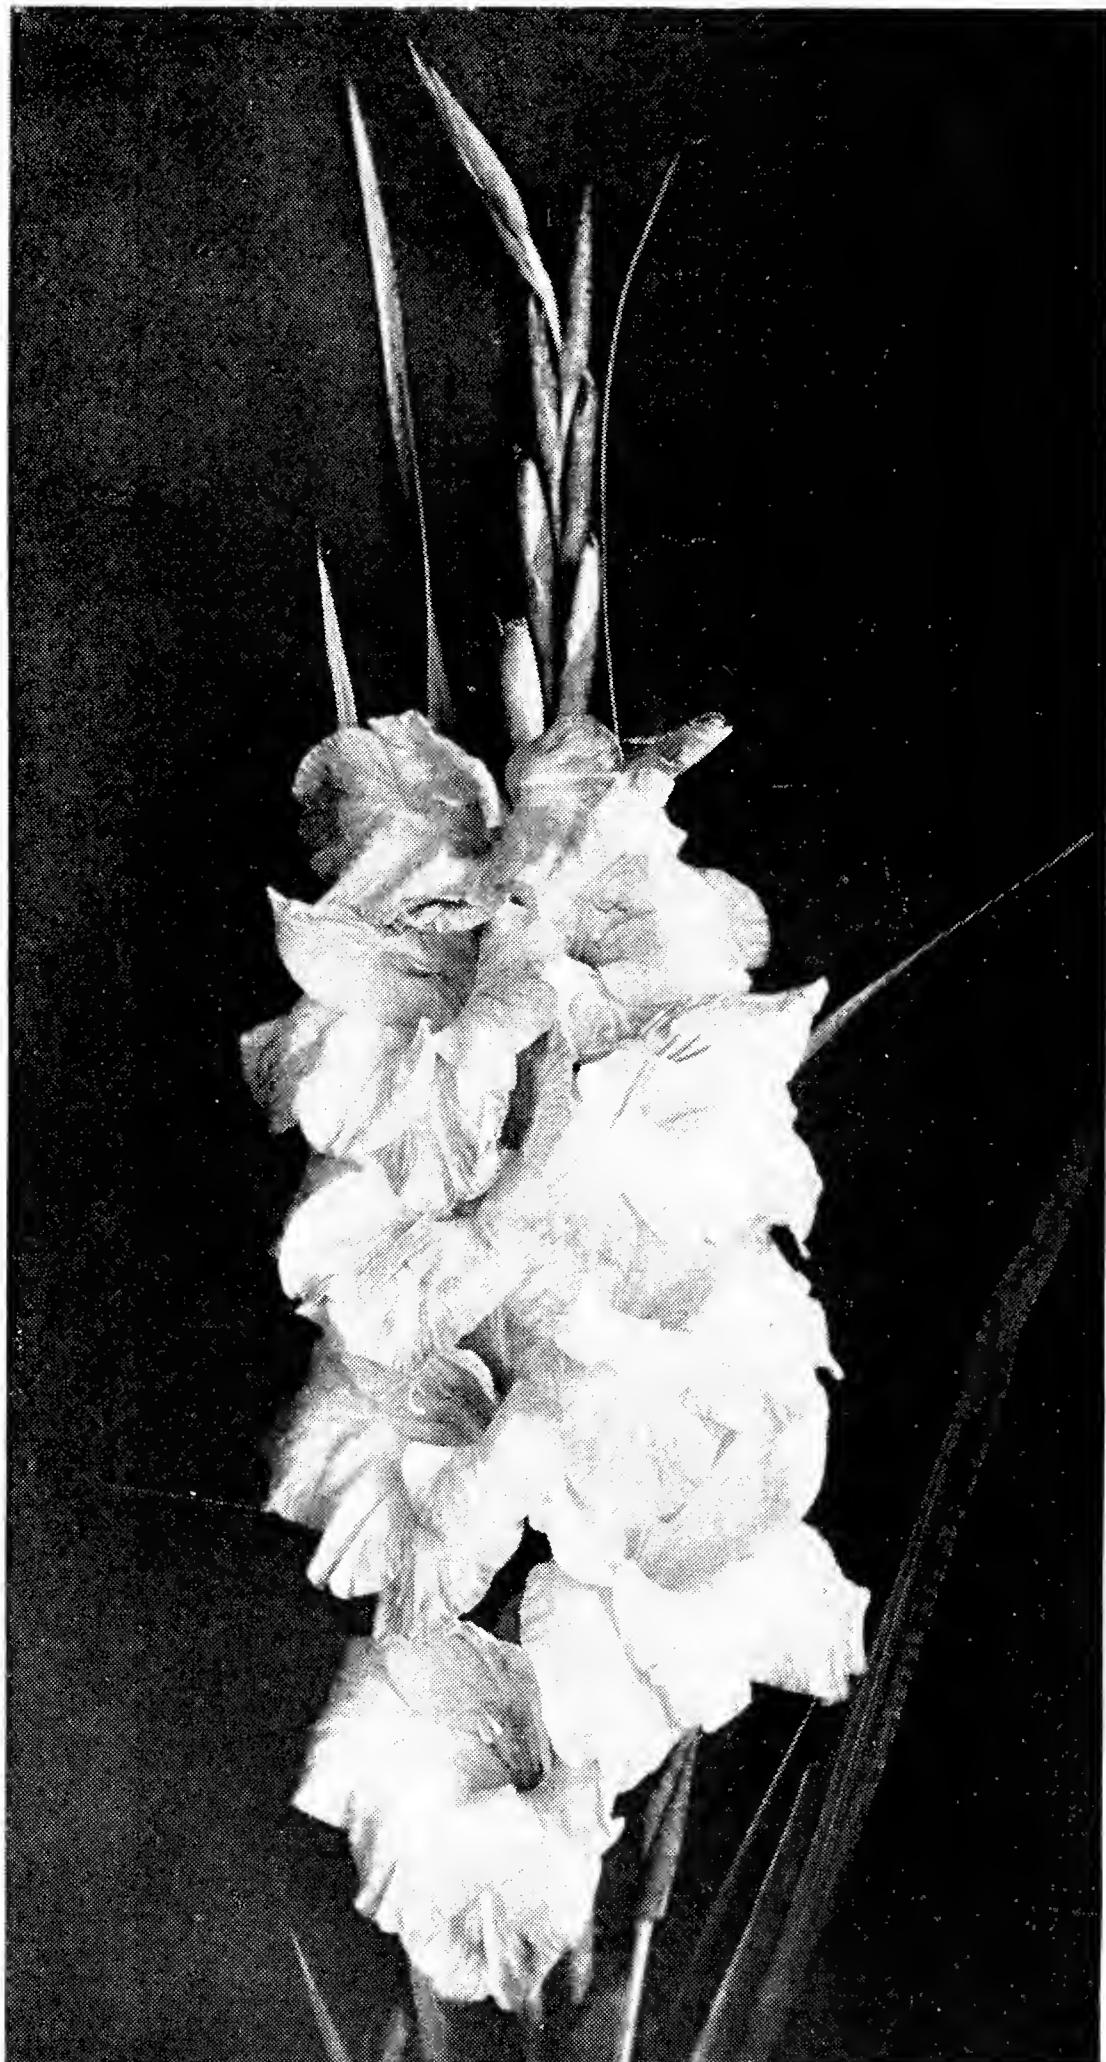

MY FORMER INTRODUCTIONS

SIEGFRIED (1936). A novelty Glad with rather small florets but many of them open at one time. In some sections this did not do well the past year but others give good reports of it. Probably should be grown to bloom in the fall for best results, although it does quite well with me during warm weather. Rose pink overlaid red with white throat and white splashes on the upper petals. A very pretty novelty Glad when well grown. See 1936 catalogue for more complete description and photo. **Large bulbs, \$1.50 each; M. \$1.00 each; S. 50c each; Blts. 15c each, 10 for \$1.20.**

FLAMING METEOR (1934). Bright deep red self. Five or six large round flowers open on about the tallest spikes of any of the varieties I grow. Does not always have perfect facing from large bulbs but usually comes quite good and smaller sizes average fine in facing of the florets. Makes good spikes from even Nos. 5 and 6 bulbs. About the most vigorous grower in my garden. Many are reporting that this is fine in the midwest and other sections and several write that Flaming Meteor has held up well in temperatures over 100 degrees. Not a rapid propagator but produces a fair number of bulblets from medium size bulbs. Bulblets grow quite readily making many large bulbs. The demand is very heavy and I do not care to spare more bulblets in quantity this year. **Large bulbs, 12c each, \$1.00 per 10; M. 8c each, 60c per 10; S. 30c per 10; Blts. 10 for 10c.**

SHIRLEY TEMPLE

CHRISTABEL

SERENADE (1934). A very pretty shade of rich pink with white throat. A good number of blooms open. Makes beautiful vases when a dozen spikes or thereabouts are grouped together. Not a very vigorous grower. Same price as Flaming Meteor.

CHRISTABEL (1933). A shade between La France and shrimp pink with cream throat. Seven to ten large florets open on long spikes. A beautiful flower which is being well received in many sections. Its worst fault is that the bulbs discolor badly although they grow vigorously. Same price as Flaming Meteor.

To seek the beauteous eye of heaven to garnish,
Is wasteful and ridiculous excess.
